

## How to register for and log in to BELD Broadband watchTVeverywhere (WTVE)

1. Type [www.watchteverywhere.com](http://www.watchteverywhere.com) into your Internet browser and hit Enter
2. From the **select your TV provider** drop down, click on BELD to display the home page for watchTVeverywhere

3. For your first time here, choose **register** to display the Registration page

## Registration

You may have up to 4 users registered on each TV service account. The first user registered must be the named account holder, age 18 or older and will be considered the Primary User.

### Subscriber Validation

Account Number:   
Last Name on Statement:   
Verification Code:  Enter: 14968

### New User Information

First Name:   
Last Name:   
Create Password:   
Retype Password:   
Password Reset Question:   
Password Reset Answer:   
Email Address:   
Retype Email Address:

#### 4. Fill out this page as follows

##### a. Subscriber Validation

- i. Type your account number from your BELD Broadband bill in the **Account Number** field—include the number preceding the dash as well as the remaining numbers (for example, 001-000001)

Thanks for using WatchTVEverywhere.

Please remember that WatchTVEverywhere can bring TV programs to your computer or mobile device, but it does not include unlimited bandwidth. By utilizing this service, you may incur additional costs from your cellular or broadband provider. Make sure you understand the terms of your service plan prior to use.

8. Type in the **Email** address you provided at registration
9. Type in the **Password** you created at registration
10. Click **Login**

10. You have now successfully logged WTVE and may view our available content by double clicking a programmer logo

### Some things to know about WTVE

- BELD Broadband's watchTVEverywhere is an additional benefit provided to all our cable subscribers at no additional cost. WTVE programming is available over the Internet and can be accessed on any device that can receive an Internet signal, and it works anywhere you can access the Internet: inside your primary residence and vacation home, at the office and in hotels, in shopping malls and airports, etc. Wired connections and in-home WiFi will provide the best quality, so be sure to call 781.348.BELD (2353) and ask about our **BELD HomeNet WiFi** service. The quality of WTVE while roaming—in airports and stores, for example—will vary depending on the strength of the signal. Note that if you are using a mobile device when you travel (especially outside the U.S.), expensive data roaming charges may apply.
- The content available to watch on your main watchTVEverywhere page is based on your level of BELD Broadband cable television service—i.e., you will only see logos displayed for channels available on your level of cable TV service. However, not all programmers are currently providing us WTVE content (HBO GO is one example). We will continue to add programming as it becomes available to us. Programming changes are posted on [beld.com](http://beld.com) and our BELDFB [Facebook](#) page, so be sure to “Like” us to stay informed.
- WTVE allows you to access additional programming from our TV networks. Both previously aired episodes and live programming will be available, depending on the network (sports and news channels are currently the most common networks to offer live streams). Each network makes its own decision about what to make available on watchTVEverywhere and when.
- Some programmers will require you to enter your credentials again once you click on their link; others will automatically display content. If you see another login screen again after you double-click on a programmer logo, just enter your information once and you shouldn't have to enter it again. (You will be logged out of our main page after 30 minutes of inactivity—don't be alarmed, this is normal and you will not be logged out of the programmer site.)
